

BIOEAST
Foresight
Report

Reflections
from the
Advisory
Council

Background

-
- The BIOEAST Advisory Council is a body of the BIOEAST Initiative.
 - The AC provides guidance to national policy makers and identifies special challenges the macro-region might be faced with.

Advisory Council's recommendations

Foresight report

immense importance as it provides pathways (scenarios) towards a more sustainable future for the BIOEAST region and highlights the key elements for a transition.

System approach

-
- transition to a sustainable circular bioeconomy should be an **overarching objective and strengthen inter-institutional collaboration.**

Multi-level
governance
systems and long-
term support
mechanisms
(enabling
conditions) for
development and
growth

-
- assign a high importance to a sustainable circular bioeconomy

Connecting circular and bioeconomy in a sustainable way

-
- **agree on a clear definition of a sustainable circular bioeconomy**

Knowledge, innovation and capacity building at multiple levels

-
- better understand (data) and utilize the potential and possible development paths

Broad social dialogue (inclusiveness) and education

-
- foster stronger public dialogue, capacity building and cooperation around the sustainable circular bioeconomy

Final remark

- the transition towards a sustainable circular bioeconomy should be common goal to ensure the sustainability, competitiveness and attractiveness of the BIOEAST region for current and future generations.
