

NEW MODEL

BioBoosters is an Interreg BSR initiative where 9 international circular bioeconomy organisations have combined their expertise to design a **model** that contributes to the development of the circular bioeconomy and the valorisation of by-products

COOPERATION

BioBoosters brings together companies and research and development organisations who are looking for solutions to today's **circular bioeconomy challenges** and more **sustainable business models** using the international hackathon model

THE PROCESS

The goal of hackathons is to create **cooperation** between organizations and winning teams, start-ups and growth companies.

By using the **business-focused hackathon process**, we can help solve the challenges that circular bioeconomy companies face in the transition to business models in the circular economy

THE BIOBOOSTERS TEAM

bb. 9 Baltic Sea circular bioeconomy organisations from 7 countries

bb. Organising hackathons, we contribute to green challenges and development at both local and international level

bb. Connecting companies with circular bioeconomy challenges and solution providers

PLAN

- bb.** Conduct **18** international circular bioeconomy hackathons
- bb.** Create **20** international science-based business cooperation initiatives
- bb.** Involve **500** experts from the circular bioeconomy sector to support the green transition in the Baltic Sea region

**JOIN US AND
BE A BIOBOOSTER!**
